

IF YOU WANT MINIATURE WORK ON A GRAND SCALE:

With this newly developed, extremely compact tooling system, we are offering new possibilities for the production of your smallest components.

DECOFLEX® is a new type of tooling interface designed for compact space and is especially useful on Turning & Milling Centers with limited working areas.

DECOFLEX®

DECOFLEX® HAS RAISED THE BAR FOR MANUFACTURING IN THE MINIATURE RANGE, DISCOVER THE DIFFERENCE.

**The perfect transformation
of a brilliant idea.**

**Until now no tooling
system could combine
precision and space in
such a small area.**

**DECOFLEX® tremendously
increases the efficiency of
your machine tool:
SMARTER TOOLING
SOLUTIONS MADE BY
EPPINGER.**

Quick change

Utilization made simple and accurate. Adapter/tool change-over performed in seconds.

Precise

Proven conical/flat face interface guarantees best possible concentricity and repeatability.

Compact

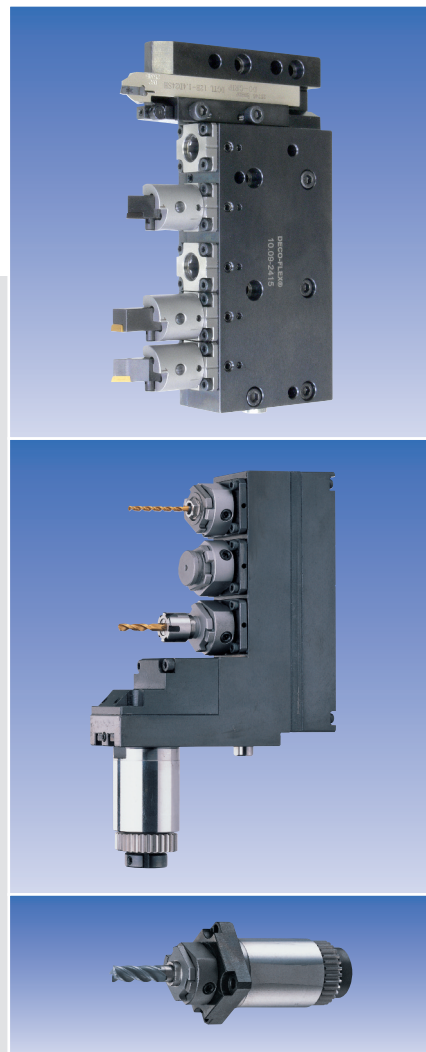

Minimal envelope dimensions, not available until now, open up new manufacturing approaches.

Flexible

Specific adapters designed to combine with fixed and/or rotary tool holders optimize tool performance to the highest degree.

Economical

Ability to pre-set tools off the machine delivers reduced set-up time and increased machine up-time.

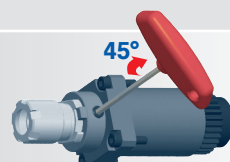

1.

2.

3.

Tool change in seconds, as simple as 1, 2, 3.
